DESCRIPTION

SOPRASEAL LM 203 is a single component, liquid product made from modified rubber. SOPRASEAL LM 203 is used as an air/vapour barrier and provides moisture protection behind wall claddings including brick, siding, metal panels, EIFS and stucco. Utilization of a slipsheet is required for stucco cladding.

RECOMMENDED SUBSTRATES

This product can be used on most building surfaces, such as masonry, concrete, wood and gypsum.

SOPRASEAL LM 203 can also be used in combination with SOPRASEAL STICK FLASHPRO HT and SOPRASEAL STICK 1100 T membranes at openings.

SURFACE PREPARATION

The substrate should be clean, sound, free of excess water and loose materials, grease and any contaminants. which may compromise the performance of the product.

APPLICATION

Apply SOPRASEAL LM 203 at openings, sheathing joints, inside and outside corners and immediately place SOPRASEAL MESH, over wet SOPRASEAL LM 203. Then, completely saturate SOPRASEAL MESH with SOPRASEAL LM 203.

To apply SOPRASEAL LM 203 use a 19 mm (¾ in) nap roller, paint brush or spray equipment.

Minimum application temperature: 4 °C (40 °F) and higher. To apply SOPRASEAL LM 203 at temperatures below 4 °C (40 °F), but above -4 °C (25 °F), blend 1 entire quart container of SOPRASEAL LT ADDITIVE.

Allow to dry completely, typically 2 to 4 hours at 25°C (77°F) and 50% relative humidity.

EQUIPMENT

The use of a 25/30 ¼" MEG tip with spraying equipment comprising a diaphragm pump and a minimum of 5 HP compressor (minimum 30 gallons) is recommended.

Recommended spraying pressure: 45 psi.

RESTRICTION

Do not use SOPRASEAL LM 203 for below grade applications or on surfaces suject to water immersion.

FOR COMPLETE INFORMATION ON PRODUCT INSTALLATION, PLEASE CONSULT YOUR SOPREMA REPRESENTATIVE.

STORAGE AND HANDLING

Shelf life: Approximately 24 months, properly stored in orininal unopened containers. Protect from freezing, extreme heat and direct sunlight.

For more information, refer to instructions on the container label and relevant safety data sheet (SDS).
