SELF-ADHERING

MANUFACTUREDIN

COLPHENE 2000

SELF-ADHERING MEMBRANE SERIES
CROSS-LAMINATED WITH HIGH PERFORMANCE HDPE CARRIER FILM

TECHNICAL DATA SHEET 171204SME1E

DESCRIPTION

COLPHENE 2000 self-adhering membrane series are manufactured from a select blend self-adhesive elastomeric SBS modified bitumen compound combined with a high performance co-extruded laminating carrier film. A silicone release paper protects the self-adhesive side while the surface is reinforced by a cross-laminated HDPE film. COLPHENE 2000 membrane series are specially designed to provide and sustain high waterproofing performance within a wide range of temperatures (10 $^{\circ}$ C to 95 $^{\circ}$ C) and a durable, water-tight seal for the building envelope protecting substrates from water infiltration during the product's life cycle.

USER APPLICATIONS

Depending on projects' specifications and requirements, COLPHENE 2000 membrane series are used for many industrial, commercial horizontal & vertical waterproofing covered applications over concrete substrate such as:

- Infrastructure Horizontal & Vertical Waterproofing Applications
- Basement Walls
- Plaza Decks
- Roof Decks
- Balconies & Terraces.
- Planter Boxes & Landscaping

Fully Adhered & Highly Flexible Membrane

Easily Conforms to Substrate Tenacious Conditions

Excellent Tensile Strength, Resistance to Tear & Puncture

Dimensionally Stable with Defined Constant Thickness

High Quality Cross-Laminated Carrier Film

- vvet Areas
- Damp-Proofing (DPC Course) Applications
- Below-Grade Vaults
- External Waterproofing of Sewage tanks, Manholes & Chambers

INSTALLATION GUIDELINES

- COLPHENE 2000 must always be laid on clean, dry, solid substrates which have previously been primed with SOPREMA'S ELASTOCOL STICK or SOPRADERE PRIMER.
- Concrete must have cured for a minimum of fourteen (14) days prior to installation.
- Conducting an adhesion test is recommended before membrane application.
- Clean, prepare and prime the substrate.
- Ensure that membrane rolls are well aligned.
- Adhere COLPHENE 2000 membrane to the substrate.
- Gradually peel back the remaining release sheet, while ensuring membrane is completely adhered.
- Use a hand-hard roller to apply uniform pressure over the entire surface.
- Apply SOPRAMASTIC LM or SOPRAMASTIC ALU to seal details and critical areas.
- Prior to backfilling, protect COLPHENE 2000 membrane with SOPRABOARD protection board or PROTECTDRAIN drainage boards.
- Use SOPRATAPE-C double-sided self-adhesive tape or an approved cold adhesive.
- For complete installation specification and information please contact your local SOPREMA representative.

USE WITH SOPREMA'S MEMBRANES 12" ROLLER CODE: 25081 CODE: 25075

For ideal application results, use SOPREMA's Rollers & Tools to install self-adhering membranes and seal overlaps.

SUSTAINABILITY, HEALTH & ENVIRONMENT

All our activities & growth target sustainable development to minimize the impact on the environment. COLPHENE 2000 membrane series do not contain any substances that might be detrimental to health or to the environment and complies with generally accepted health standards. Please refer to the product's Safety Data Sheet for more information.

QUALITY CONTROL

COLPHENE 2000 membrane series are manufactured in ISO-9001 certified SOPREMA factories which are audited by Third-Party organizations such as Underwriters Laboratories (UL) and FM Global. The system membranes are manufactured to meet SOPREMA's Quality Management Manual.

STORAGE & HANDLING

Rolls must be stored in a shaded area in an upright position with the selvedge side on top.

SOPREMA may modify the composition and/or utilization of its products without prior notice.
