

# RECYCLED CONTENT CERTIFICATE

Standards applied: ISO 14020/21  
Period of validity: 01/10/2020–30/09/2021

## SOPRA-CELLULOSE

SOPRA-CELLULOSE is a blow-in insulation made of paper or cardboard. It is odourless and has a low VOC content. It acts as a protective shield to reduce the transmission of heat and sound.

## RECYCLED CONTENT<sup>1</sup>

SOPRA-CELLULOSE LINE PRODUCTS COVERED	PRE-CONSUMER	POST-CONSUMER	TOTAL
SOPRA-CELLULOSE AB	83%	0%	83%
SOPRA-CELLULOSE	83%	0%	83%

<sup>1</sup>**Recycled content:** Proportion, by mass (dry weight), of recycled material in a product. Materials are considered as “pre-consumer” when they are diverted from the waste stream during the manufacturing process and originating from a process other than the one that generated them, and “post-consumer” when they are generated by households or by commercial and industrial facilities after their use (adapted from ISO 14021).

## METHODOLOGY

- 1. Verification protocol.** This certificate follows the CT Consultant v.1 protocol – Audit of material supply and validation of inventory data complying with ISO 14020:2000 and ISO 14021:2016.
- 2. Manufacturing plant.** The data refers to the SOPRA-CELLULOSE manufactured at the SOPREMA plant located at 1451 Nobel Street, Sainte-Julie, Québec, Canada, J3E 1Z4.
- 3. Liability.** SOPREMA warrants the accuracy of the information provided in this certificate. CT Consultant shall not be held liable for any damage resulting from an omission of important information or from a false or misleading statement.
- 4. Note.** The present certificate focuses solely on the recycled content of the products concerned. Thus, it is not a lifecycle assessment demonstrating environmental benefits related to recycled content.
