## DESCRIPTION

COLPHENE BSW PROTECT'R is a protection sheet composed of SBS modified bitumen and a composite reinforcement. The surface is sanded, while the underface is covered with a release protection film.

COLPHENE BSW PROTECT'R is used as protection layer over the COLPHENE BSW H membrane prior to the placement of the reinforcement steel bars and poured in place concrete slab.

## INSTALLATION

### SELF-ADHESIVE

COLPHENE BSW PROTECT'R must be adhered, in longitudinal strip centered over COLPHENE BSW H side laps, by peeling off the release protection film. Once installed, a pressure must be applied over the whole surface using a membrane roller to ensure good contact.

FOR COMPLETE INFORMATION ON PRODUCT INSTALLATION, PLEASE CONSULT YOUR SOPREMA REPRESENTATIVE.
