

Fastening patterns		
ZONES		FM 1-75
A	Field surface	450 mm (18 in) o.c.
B	Perimeter	270 mm (10 in) o.c.
C	Corners	150 mm (6 in) o.c., max

Fastening patterns have been determined as per FM 4470 standard and meets the Factory Mutual (FM) requirements. Use membranes, anchors and other components approved for this system only. **Dimensions shown in this table represent the maximum allowable distance between fasteners. It may have to be adjusted, downward, to coincide with the top flute of the metal deck.** For more details about applicable requirement, consult publications according to FM 4470 (RoofNav Database) including recommendations for corners and perimeters listed in th PLPDS 1-28 and 1-29 from Factory Mutual.
