

(i): Always install Sopradrain 10G, 15G or 18G filter fabric towards soil retention system. Primer is recommended over drainage board for application below 10°C.

(ii): Colphene BSW V and Colphene STICK LAP reinforcement installed over primed surface and all edges sealed is an acceptable alternative to Colphene BSW H and Colphene SP LAP reinforcement

(iii): Primer + Colphene BSW Protect'R are required over Colphene BSW V for application under high water table level mark / high hydrostatic head.
