

SAFETY DATA SHEET

WATERPROOFING MEMBRANE

Offerte en français

GHS	PROTECTIVE CLOTHING	TRANSPORT OF DANGEROUS GOODS	
Not regulated	De C	Not regulated	

SECTION I: IDENTIFICATION

Trade names: Acoustidrain, Duolap Cap GR, Flash Stick LT, High Resistance Cap Sheet Membrane – Single-ply, High Resistance Cap Sheet Membrane – Two-ply,

ICF Foundation Waterproofing Membrane, Joist Guard, Lap Stick, Lastobond Sanded Finish, Lastobond HT-N, Lastobond HT-S, Lastobond-Pro LT, Lastobond Smooth Seal HT, Lastobond TU-HT, LB 1236, LB 1244, Multipurpose Aluminum Waterproofing Membrane, Red Zone Waterproofing Membrane, Red Zone 25, Red Zone 25 All Temperatures, Redzone Pro, Resisto Base Sheet Membrane, Resisto SA, Resisto Select, Resisto STT, VB

30. VB50.

Use: Membranes are used for all types of roofing needs, air barrier and waterproofing protection.

SECTION II: HAZARD(S) IDENTIFICATION

Bitumen membrane. Asphalt odour. Under normal use, this product is not expected to create any health or environmental hazard. Inhalation of dust or asphalt fumes can cause respiratory irritation and/or congestion.

SECTION III: COMPOSITION AND INFORMATION ON HAZARDOUS INGREDIENTS						
NAME	CAS#	% WEIGHT	EXPOSURE LIMIT (ACGIH)			
			TLV-TWA	TLV-STEL		
BITUMINOUS BLEND						
Bitumen ¹	8052-42-4	15-40	0.5 mg/m³ Asphalt fumes	Not established		
Oxidized bitumen ¹	64742-93-4	0-20	0.5 mg/m³ Asphalt fumes	Not established		
Self-adhesive membranes contain: Highly hydrotreated naphthenic oil ¹	64742-52-5	1-5	Not established	Not established		
Calcium carbonate ¹	471-34-1	0-30	10 mg/m³	Not established		
Styrene butadiene copolymer ¹	9003-55-8	1-5	10 mg/m³	Not established		
REINFORCEMENT						
Some products may contain fibre glass, polyester or a mix of glass grid and polyester.						
Polyester mat ¹	N/A	0-7	Not established	Not established		
Fibre glass mat ¹	N/A	0-7	Not established	Not established		
Contains: Fibre glass filament ¹	65997-17-3	0-7	1 f/cc	Not established		
UNDERFACE AND SURFACE						
Some membranes are protected by sand, talc, mineral granule, silicone paper, polyethylene or polypropylene film, aluminium, copper or						
stainless steel foil.						
Silicone paper	N/A	0-5	Not established	Not established		
Polypropylene film	N/A	0-5	Not established	Not established		
Polyethylene film	9002-88-4	0-5	Not established	Not established		
Aluminium, copper or stainless steel foil	N/A	0-15	Not established	Not established		

The exposure to the product above the limits of exposure is not likely to occur considering its form (incorporated in the mixture) and the provided use. The limit of exposure is given for reference only.

Effects of short term (acute) exposure

SKIN CONTACT

The product can cause a mechanical irritation of the skin because of its rough surface. The product may stain and stick to the skin. The contact with this product at high temperature can cause thermal burns.

EYE CONTACT

The product is not likely to cause effects to the eyes. The contact with this product at high temperature can cause thermal burns.

INHALATION

The product is not likely to cause effects to the respiratory system. If the membrane is burned, asphalt fumes can be emitted and cause irritations to the nose, the throat and the respiratory tracts, tiredness, headaches, dizziness, nauseas, and insomnia.

INGESTION

Exposure is not likely to occur by this route of entry under normal use of the product.

Effects of long term (chronic) exposure

SKIN CONTACT

The repeated or prolonged contact can cause irritation. (1)

INHALATION

Under normal use, the product is not likely to cause effects to the respiratory system.

CARCINOGENICITY

Due to the product form, exposure to hazardous dusts or fumes is not expected to occur. Information on carcinogenicity is given for reference only. This product is not classifiable as a carcinogen.

Bitumen: Asphalt fumes may contain a variety of polycyclic aromatic hydrocarbons (PAH), some of which are associated with the potential of inducing skin cancer. Increasing amounts of PAH may be released if this product is heated above 200°C. Prolonged or repeated contact of PAH with skin may cause skin cancer where poor personal hygiene may be a contributing factor. Asphalt fumes contain substances such as Benzo(a)pyrene and Dibenzo(a,h)anthracene that are known to cause cancer in humans. In its 2013 monograph (Volume 103), the International Agency for Research on Cancer (IARC) conducted a review of the potential carcinogenicity of bitumen (the European term for asphalt). One of its conclusions was that the "occupational exposures to straight-run bitumens and their emissions during road paving are possibly carcinogenic to humans (group 2B)". However, due to the product form, exposure to such component is unlikely under normal conditions of use. (1,2,4)

Oxidized bitumen: In its 2013 monograph (Volume 103), IARC conducted a review of the potential carcinogenicity of bitumen (the European term for asphalt). One of its conclusions was "occupational exposures to oxidized bitumens and their emissions during roofing are classified in IARC Group 2A, probably carcinogenic to humans.". However, due to the product form, exposure to such component is unlikely under normal conditions of use. (4)

Fibreglass filament: Fibreglass is not expected to be released. In October 2001, the IARC classified fibreglass as Group 3 "not classifiable as to its carcinogenicity to humans". The 2001 decision was based on current human and animal researches that showed no association between inhalation exposure to dust from fibreglass wool and the development of respiratory disease. This is a reversal of a study of the American Conference of Governmental Industrial Hygienists (ACGIH) and the National Toxicology Program (NTP) in 1987 that classified the product in Group 2B (possibly carcinogenic to humans). Those results were based on studies in which animals were injected with large quantities of fibreglass.

No information is available about other products.

TERATOGENICITY, EMBRIOTOXICITY, FETOTOXICITY

No information available

REPRODUCTIVE TOXICITY

No information available

MUTAGENICITY

No information available

TOXICOLOGICALLY SYNERGISTIC MATERIALS

No information available

POTENTIAL ACCUMULATION

No information available

SECTION IV: FIRST-AID MEASURES

SKIN CONTACT

If there is presence of dust or stains on the skin, wash gently with water and soap. In the event of contact with the product melted, do not try to remove it from the affected area. Rinse in cold water. Obtain immediate medical attention.

EYE CONTACT

Flush eyes with water for at least 15 minutes while holding eyelids open. Do not attempt to remove material from affected area without medical assistance. Obtain immediate medical attention.

INHALATION

Remove victim from contaminated place and restore breathing if required.

INGESTION

The ingestion of this product is not very likely to occur.

SECTION V: FIRE-FIGHTING MEASURES

FLAMMABILITY: Not applicable EXPLOSION DATA: Not applicable FLASH POINT: Not applicable

AUTO-IGNITION TEMPERATURE: Not applicable FLAMMABILITY LIMITS IN AIR: (% in volume) Not applicable

FIRE AND EXPLOSION HAZARDS

If the product is heated, take note that asphalt fumes are flammable. Do not use water on an asphalt fire.

COMBUSTION PRODUCTS

Burning of this material will produce thick black smoke. Irritating and/or toxic gases (including hydrogen sulphide and sulphur dioxide) and traces of metallic fumes may be generated by thermal decomposition or combustion.

FIRE FIGHTING INSTRUCTIONS

Evacuate the area. Wear self-contained breathing apparatus and appropriate protective clothing that are in accordance with standards. Approach fire from upwind and fight it from maximum distance or use unmanned hose holders or monitor nozzles. Always stay away from the containers at the time of the fire considering the high risk of explosion. Move the rolls of membrane from fire area if it can be done without risk. Cool the rolls of membrane with flooding quantities of water until well after fire is out.

EXTINGUISHING MEDIA: Foam, CO₂, sand, and chemical powder.

SECTION VI: ACCIDENTAL RELEASE MEASURES

RELEASE OR SPILL

If hot material is spilled, allow enough time to cool completely and place it in a container for disposal. Wear appropriate breathing apparatus (if applicable) and protective clothing. Notify appropriate environmental agencies. Wash spill area with soap and water. Dispose of the material according to local environmental regulations.

SECTION VII: HANDLING AND STORAGE

HANDLING

Avoid contact with skin, eyes and clothes. Do not ingest. Wash hands after manipulation.

STORAGE

Flashings must be stored in such a way to prevent any creasing, twisting, scratches and other damages of the roof. The materials must be protected adequately and stored permanently away from flames or welding sparks, protected from bad weather and any harmful substances. Self-adhesive membranes must be stored away from the sun.

SECTION VIII: EXPOSURE CONTROLS AND PERSONAL PROTECTION

HANDS: Wear resistant gloves.

RESPIRATORY: If the threshold limit value (TLV) for dust is exceeded and if use is performed in a poorly ventilated confined area, use an approved respirator that is in accordance with standards.

EYES: Wear safety goggles that are in accordance with standards.

BODY: Wear adequate protective clothes. **OTHERS:** Eye bath and safety shower.

SECTION IX: PHYSICAL AND CHEMICAL PROPERTIES

PHYSICAL STATE: Solid ODOUR AND APPEARANCE: Black membrane with asphalt odour

ODOUR THRESHOLD:
Not available

VAPOUR PRESSURE (20°C): Not applicable VAPOUR DENSITY (air = 1): Not applicable

EVAPORATION RATE (Butyl acetate = 1):

BOILING POINT (760 mm Hg):

Not applicable
Not applicable
Not applicable

SPECIFIC GRAVITY (H_2O = 1): Not applicable **SOLUBILITY IN WATER (20°C):** None

VOLATIL ORGANIC COMPOUND CONTENT (V.O.C.):

Not measurable (0 g/L) Not applicable

VISCOSITY: Not applie

SECTION X: STABILITY AND REACTIVITY

CONDITIONS OF REACTIVITY: Avoid excessive heat.

CONDITIONS OF REACTIVITY: Avoid excessive heat.

INCOMPATIBILITY: Avoid strong acids and strong alkalis, oxidizers

organic solvents, and greasy substances

STABILITY: This material is stable.

HAZARDOUS DECOMPOSITION PRODUCTS: None identified

HAZARDOUS POLYMERISATION: None

SECTION XI: TOXICOLOGICAL INFORMATION

TOXICOLOGICAL DATA

No information is available.

Effects of Short-Term (Acute) Exposure

No information available

Effects of Long-Term (Chronic) Exposure

CARCINOGENICITY

Bitumen: Data from experimental studies on animals and cultured mammalian cells indicate that laboratory-generated roofing asphalt fume condensates are genotoxic and cause skin tumours. (2)

Highly hydrotreated naphthenic oil: No study on the human and the animals made it possible to classify naphthenic oils highly hydrotreated as carcinogen (IARC, 1984). (1)

No information is available about other products.

REPRODUCTIVE EFFECTS

No information available

TERATOGENICITY, EMBRYOTOXICITY, FETOTOXICITY

No information available

MUTAGENICITY

No information is available.

SECTION XII: ECOLOGICAL INFORMATION

ENVIRONMENTAL EFFECTS

No data available

BIODEGRADABILITY

This product is not biodegradable. There is no possible bioaccumulation and unlikely bioconcentration in the food chain.

SECTION XIII: DISPOSAL CONSIDERATIONS

WASTE DISPOSAL

This product is not hazardous waste. Consult local, provincial, territory or state authorities to know disposal methods. This material is not listed by the EPA as hazardous waste according to the *Resource Conservation and Recovery Act* (RCRA) of the United States. No EPA waste numbers are applicable for this product.

SECTION XIV: TRANSPORT INFORMATION

This product is not regulated by the Department of Transportation (DOT) and Transportation Dangerous Goods (TDG).

SECTION XV: REGULATORY INFORMATION

DSL: All constituents of this product are included in the Domestic Substances List (DSL) of Canada.

TSCA: All constituents of this product are listed on the Toxic Substances Control Act Inventory (TSCA) of the United

Prop. 65: This product does not contain chemicals known to the State of California to cause cancer or reproductive toxicity.

SECTION XVI: OTHER INFORMATION

GLOSSARY

CAS: Chemical Abstract Services

CSA: Canadian Standardization Association

GHS: Globally Harmonized System

LD₅₀/CL₅₀: Less high lethal dose and lethal concentration published TLV-TWA: Threshold Limit Value – Time-weighted average
