

PRODUCT DATA SHEET

DESCRIPTION

The DISC for TUNNEL LINING is a PVC accessories for underground works and have a central cavity to take a washer for the fixing nail. On the lower face the disc is ribbed to improve the adhesion to the support. The DISC for TUNNEL LINING are compatible with all the accessories and membrane in the FLAGON PVC range.

STORAGE & HANDLING

DISC must be stored in shaded and well ventilated storage space.

USER APPLICATION

The DISC for TUNNEL LINING allow you to fix the geotextile to the vertical support of foundation or tunnelling. The discs are fixed with a special gun with an explosive charge. Once the geotextile is fixed, the discs serve as anchor points for the welding of the waterproofing membrane to the vertical wall. The welding are made with hot air with manual welder.

ADVANTAGES

- Flexibility at low temperatures
- High puncturing resistance
- Will not rot
- Excellent weldability

HEALTH, SAFETY & ENVIRONMENT

The product does not contain any substance likely to be detrimental to health or to the environment and complies with generally admitted Health & Safety Requirements. For further information please refer to relevant Material Safety Data Sheet (MSDS).

TRACEABILITY

Product traceability is ensured through a manufacturing identification present on the packaging.

QUALITY MANAGEMENT

SOPREMA always recognises as a high level of importance the quality of the products, the environment and safety. For this reason, we operate independently monitored Quality Management Systems in line with ISO 9001:2015.

COMPOSITION & PACKAGING

PROPERTY	DISC
Total diameter	80 mm
Cavity diameter	26 mm
Hole diameter	22 mm
Height	10 mm
Thickness	2.5 mm
Qty. per box	100
Weight	0.035 kg
Colour	Black
