DESCRIPTION

SOPRA-ISO SILVER is a high performance thermal insulation board. It is composed of closed-cell polyisocyanurate (PIR) foam laminated on both sides with a textured aluminium facer providing great fire resistance.

SOPRA-ISO SILVER has amongst the highest thermal values of the rigid board insulation products, giving buildings continued thermal efficiency throughout their life span.

SOPRA-ISO SILVER is mainly used as thermal insulation for SOPREMA bitumen, PVC and TPO roofing systems. It has a light weight closed cell foam core which makes it easy to handle and allows fast fixing to any application.

Compliance with AS/NZS 4859.1

Superior thermal performance

Superior compressive strength

Great dimensional stability

Great fire resistance

FIELD OF APPLICATION

SOPRA-ISO SILVER is recommended for roofs and decks, protected against weathering by waterproofing membranes, with high pressure resistance.

INSTALLATION PROCEDURE

APPLICATION:

SOPRA-ISO SILVER boards are mechanically fastened with screws and stress plates, or adhered with DUOTACK adhesive.

The waterproofing membrane system can be loose-laid under ballast, mechanically fastened, self-adhered or adhered with cold adhesive.

FOR COMPLETE INFORMATION ON PRODUCT INSTALLATION, PLEASE CONSULT YOUR SOPREMA REPRESENTATIVE.
