- Can be used directly on an application gun or as an aerosol with the spray nozzle
- Chemical base: Acetone

RECOMMENDED USES:

- Outdoor use
- Developed for cleaning foam guns, tools, and work surfaces

COMPLEMENTARY TO OTHER RESISTO PRODUCTS

Distributed by **RESISTO**®

APPLICATION

Shake the can containing ALSAN FOAM CL-F well before use. For general cleaning purposes, insert the black spray activator onto the valve stem of the can. Press the black activator to spray ALSAN FOAM CL-F to the surface to be cleaned.

For foam gun unit cleaning: Clean the gun adapter valve area using the general cleaning method described above to remove any fresh foam. Screw the can tightly onto the gun adaptor and press the trigger to flush ALSAN FOAM CL-F through the adaptor for at least five seconds, ensuring it is thoroughly cleaned. For a multiple foam-can project, it is not necessary to flush the dispensing unit after every can. When switching to a new can of foam, always replace the empty product container immediately.

Read the gun manufacturer's instructions for proper use of the application tool.

RESTRICTIONS

Hardened foam can only be mechanically removed. ALSAN FOAM CL-F contains active ingredients that can dissolve and soften plastics, paints, coatings, inks, labels, textiles, etc. It is advisable to check compatibility before cleaning.
